

## **Statutory Language Relevant to Sustainable Communities Strategies**

The Delta Reform Act establishes specific criteria and exclusions for actions that are covered by the Delta Plan. One of these exclusions is for actions within the secondary zone of the Delta that a metropolitan planning organization determines are consistent with its Sustainable Communities Strategy (SCS). Such proposed actions are *not* “covered actions” regulated by the DSC. Water Code Section 85057.5(b)(4) states:

“Covered action” does not include any of the following: ...Any plan, program, project, or activity within the secondary zone of the Delta that the applicable metropolitan planning organization under Section 65080 of the Government Code has determined is consistent with either a sustainable communities strategy or an alternative planning strategy that the State Air Resources Board has determined would, if implemented, achieve the greenhouse gas emission reduction targets established by that board pursuant to subparagraph (A) of paragraph (2) of subdivision (b) of Section 65080 of the Government Code. For purposes of this paragraph, “consistent with” means consistent with the use designation, density, building intensity, transportation plan, and applicable policies specified for the area in the sustainable communities strategy or the alternative planning strategy, as applicable, and any infrastructure necessary to support the plan, program, project, or activity.

Pursuant to Water Code Section 85212, the DSC is required to review SCSs for consistency with Delta Plan. The law states:

The council shall review and provide timely advice to local and regional planning agencies regarding the consistency of local and regional planning documents, including sustainable communities strategies and alternative planning strategies prepared pursuant to Section 65080 of the Government Code, with the Delta Plan. The council's input shall include, but not be limited to, reviewing the consistency of local and regional planning documents with the ecosystem restoration needs of the Delta and reviewing whether the lands set aside for natural resource protection are sufficient to meet the Delta's ecosystem needs. A metropolitan planning organization preparing a regional transportation plan under Section 65080 of the Government Code that includes land within the primary or secondary zones of the Delta shall consult with the council early in the planning process regarding the issues and policy choices relating to the council's advice. No later than 60 days prior to the adoption of a final regional transportation plan, the metropolitan planning organization shall provide the council with a draft sustainable communities strategy and an alternative planning strategy, if any. Concurrently, the metropolitan planning organization shall provide notice of its submission to the council in the same manner in which agencies file a certificate of consistency pursuant to Section 85225. If the council concludes that the draft sustainable communities strategy or alternative planning strategy is inconsistent with the Delta Plan, the council shall provide written notice of the claimed inconsistency to the metropolitan planning organization no later than 30 days prior to the adoption of the final regional transportation plan. If the council provides timely notice of a claimed inconsistency, the metropolitan planning organization's adoption of the final regional transportation plan shall include a detailed response to the council's notice.
